These high viscosity grades are premium-quality anti-wear hydraulic oils with excellent stability, designed to meet the most stringent requirements of most all the major manufacturers and users of industrial equipment. These oils are characterized by outstanding rust protection, low deposit formation, good demulsibility, oxidation resistance, and good anti-foam properties. They contain an effective anti-wear agent that helps reduce wear in a variety of industrial equipment.

APPLICATIONS

Recommended for those lubricant applications where the manufacturer has suggested a high viscosity premium hydraulic oil.
